# **80W DALI+PUSH Dimming power supply**

#### **Features**

- Class II, SELV, Independent
- Input Voltage 220-240VAC
- Protections: SCP/OLP/OVP
- Power Factor: 0.9@Full Load
- Efficiency: ≥86%@Full Load
- 5 years warranty
- Support DALI-2, Push Dimming

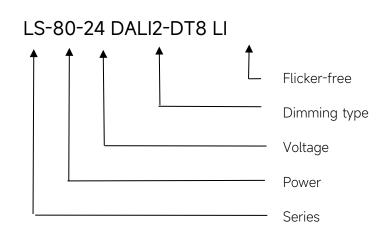

#### Applications

LED strips

#### Description

LS-80-24 DALI2-DT8 LI is an 80W constant Voltage LED driver that operates from176-264Vac input with 24V output voltage. With it's compact dimensions from 340 x 45 x 30.5 mm. It is easy to integrate in LED strips products. To ensure trouble-free operation, protection is provided against output short circuit and over Load.

#### Model code

## LS-80-24 DALI2-DT8 LI

## Specification

|   | Constant Voltage                  | 24VDC   |  |  |
|---|-----------------------------------|---|--|--|
|   | Current Range                     | 0-3.33A   |  |  |
|   | Voltage Accuracy                  | ±5%   |  |  |
| Output  | Output HF current ripple(≥1KHz)   | ±1%   |  |  |
| ·   | Output LF current ripple(<120Hz)  | ±1%   |  |  |
|   | SVM                               | ≤0.4@Full Load  |  |  |
|   | Pst                               | ≤1@Full Load  |  |  |
|   | Efficiency(Typ.)                  | ≥86%@Full Load  |  |  |
|   | Rated input voltage               | 220-240VAC  |  |  |
|   | Range of input voltage            | 176-264VAC  |  |  |
|   | Rated input voltage(DC)           | 176-280VDC  |  |  |
|   | Frequency(Hz)                     | 0/50/60 Hz  |  |  |
|   | Displacement factor               | ≥0.9  |  |  |
|   | Power Factor                      | 0.9@Full Load, 230V   |  |  |
| Input   | Input Current max                 | 0.63A MAX   |  |  |
|   | Start-up time                     | < 0.5S  |  |  |
|   | No Load Power                     | ≤0.5W   |  |  |
|   | Standby Power                     | ≤0.5W   |  |  |
|   | Network standby power             | ≤0.5W   |  |  |

| Tap and hold<br>(0.5 -120s)   | Off            | Turn on the light and turn it on from the minimum brightness  | Turn on the light at the lowest brightness and<br>turn it down from the warmest color<br>temperature  |  |
| Enter Corridor mode:<br>Hold down for 120<br>seconds  | Мах            | First, long press dimming to the darkest, 120S<br>to the brightest indicates entering the corridor<br>mode, if there is a save color temperature,<br>switch to the save color temperature | First, long press dimming to the darkest, 120S to<br>the brightest indicates entering the corridor<br>mode, if there is a save color temperature, switch<br>to the save color temperature   |  |
| Enter Corridor mode:<br>Hold down for 120<br>seconds  | Min            | to the brightest indicates entering the corridor<br>mode, if there is a save color temperature,   | First, long press the dimmer to the brightest,<br>then turn it to the darkest in 120S, then turn it up<br>to the brightest indicates entering the corridor<br>mode, and switch to the saved color temperature<br>if there is a save color temperature |  |
| Exit Corridor mode: Tap 5<br>times within 3 seconds   | Corridor model | Quits The corridor mode and enters the PUSH mod   | Quits The corridor mode and enters the PUSH mod   |  |

#### Attention:

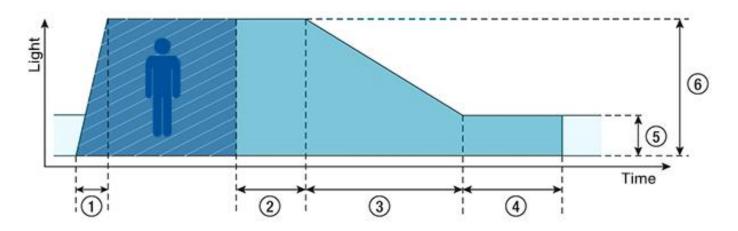

1. Do not use PUSH dimming and DALI dimming at the same time, otherwise it may damage other DALI equipment

2.PUSH Button needs to be connected to 50/60Hz AC, can not be PUSH dimming when connected to DC

3. The product enters PUSH mode after PUSH dimming. If DALI mode needs to be returned, send DALI instructions to return to DALI mode and power-on.

#### Corridor mode

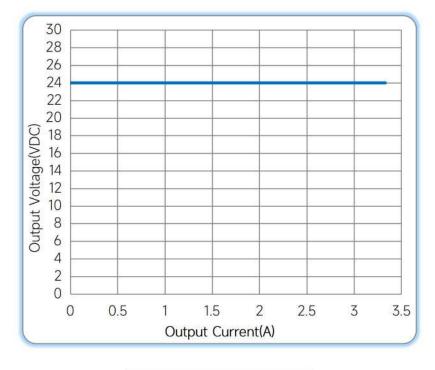

- ①Fade-in time(0.5s): the time that starts as soon as the presence of a person is detected. During the fade-in time the luminous intensity is faded up to the presence value.
- ②Run-on time(120s): the time that starts as soon as the presence of a person is no longer detected. If the presence of a person is detected again during the run-on time the run-on time is restarted from zero. If no presence is detected during the run-on time the fade time is started as soon as the run-on time expires.
- ③Fade time(32s): the time during which the luminous intensity is faded from the presence value to the absence value.
- **④Switch-off delay (Never Off):** the time during which the absence value is held before the lighting is switched off. Depending on the profile selected the switch-off delay may have different values or may not be defined.
- **SAbsence value(default: 10 %):** the luminous intensity when there is no person present.
- **OPresence value (default: 100 %):** the luminous intensity when persons are present.
