

RMOD400-EW Series / Plug & Play E-Mobility

400W / Extra-Wide Input 33.6V - 125VDC

FEATURES

- On-Board DC/DC Converter
- E-Mobility and industry vehicles
- Very wide input voltage range for 48V / 80V / 96V
- Plug & Play, ready to use
- Chassis mount and base plate cooled
- Full power at ambient temperature up to 85°C
- Water and dust proof (IP69K), robust and reliable
- High and extremely constant efficiency
- Parallel operation without active current sharing
- High power density
- 2 years warranty

Dimensions (LxWxH): 203.0 x 115.0 x 61.0mm (8.0 x 4.53 x 2.4 inch)
1700g (3.75 lbs)

APPLICATIONS

SAFETY & EMC

DESCRIPTION

The RMOD families are extremely robust plug & play modules which are used to generate the low voltage network from a vehicle's traction battery. The ultra-wide input voltage range up to 125VDC covers all common battery voltages in the off-highway vehicle (OHV) segment. Thanks to the waterproof and dust proof housing construction, the devices can be connected mechanically and thermally directly to the chassis, i.e., at any point on the vehicle, and will therefore operate reliably even under the most adverse conditions. This solution is ideal for electric vehicles with nominal 48V...96V battery-powered systems in "Off-Highway E-Mobility Applications" such as Material Handling, Forklift trucks, Golf cars, AGVs, Loaders, Construction vehicles, Airport equipment, People mover, Special vehicles, Transporters, Tractors, etc.

SELECTION GUIDE

Parallel operation is possible with all combinations of DC/DC converter versions providing they have the same rated output voltage.

There is no active current sharing and therefore the units connected in parallel could be contributing different amounts to the total load current.
